## ABOUT ME AND OBJECTIVES

### About Me

I am a Full Stack Developer, who loves to learn new things. But it is very important for me to know what kind of problems I can solve after learning. I put my attention in adding new features and removing bugs from projects writing clean and effective code. I like to read books related to Personal Development and Personal Growth. I also write blogs related to modern frameworks and some general things. I like to workout in Gym.

### Objectives

I am looking forward to join an organization where I can provide my services as a Full Stack Developer. I am looking forward the position of a Full Stack Developer in order to add the value to organization by the means of my current skills and from where I can learn new things i order to make myself better. I am very flexible person and highly determined and committed person. I am very comfortable working with MEAN and MERN Stack, if organization require something else, then learning that technology is not a problem for me as well.

## EXPERIENCE
